Profile

An enthusiastic and detail-oriented Junior Web Frontend Developer with hands-on experience since April 2025. A vocational high school graduate with a strong command of JavaScript, PHP, and Tailwind CSS for building functional and interactive web solutions. Possesses a fundamental understanding of React and is committed to creating efficient web applications.

Projects

Indragiri Belari Community Website

- Developed a comprehensive website for a running community, complete with a dashboard, articles, gallery, and event registration features.
- Utilized PHP, JavaScript, and Tailwind CSS for a modern and responsive design.
- Link: https://indragiriberlari.com

KoncoHost (Personal Hosting Service)

- Initiated and developed a personal web hosting service by configuring a VPS server on Ubuntu Linux.
- Built a custom hosting panel using PHP, demonstrating a solid understanding of backend architecture and system management.
